

# Creede Health Fair May 2, 2026

@ The Creede Family Practice & Mineral County Public Health Office

**Lab Draw from 8:00 AM- 11:00 AM**

**Health Fair 8:00 AM- 12:00 PM**

## INFORMATION:

- The Rio Grande Hospital (RGH) offers all laboratory services. The cost of the blood work ordered will be paid to RGH.
- The Mineral County Public Health Council is providing light snacks.
- Financial assistance will be available to cover the cost of labs.
- We do not have final confirmation of vendors/providers that will be present.

Please call the Mineral County Public Health Office at 719-658-2416 if you have any questions or would like to request a voucher.

### *Labs Offered at the 2026 Creede Health Fair*

<b>Test</b>	<b>Indication</b>	<b>Cost</b>
Chemistry Panel with Lipids and TSH	<p>Blood chemistry tests measure the amounts of certain chemicals in a blood sample. They show how well certain organs are working and can help find abnormalities.</p> <p>This group of tests measures the amount of cholesterol and other fats in your blood. Cholesterol and triglycerides are lipids or fats. These fats are important for cell health, but can be harmful when they build up in the blood.</p> <p>A TSH test measures the amount of thyroid-stimulating hormone (TSH) in your blood. The pituitary gland produces TSH. It prompts the thyroid gland to make and release thyroid hormones into the blood.</p>	\$30.00
PSA	Recommended for males aged 55-69. The PSA test is a blood test to help detect prostate cancer. But it's	\$30.00

	not perfect and will not find all prostate cancers. PSA is a protein made only by the prostate gland.	
CBC	It can reflect acute or chronic infection, allergies, or clotting problems. The CBC test identifies and counts the 7 types of blood cells: red blood cells, neutrophils, eosinophils, basophils, lymphocytes, monocytes, and platelets.	\$20.00
Hemoglobin A1C	measures the amount of blood sugar (glucose) attached to your hemoglobin. Hemoglobin is the part of your red blood cells that carries oxygen from your lungs to the rest of your body. It is an important blood test that indicates how well your diabetes is being controlled.	\$30.00
Blood Type	Matching compatible blood types is essential for blood transfusions. Knowing your type and compatibility is crucial if you ever need a transfusion.	\$20.00
Vitamin D	A vitamin D test screens for low vitamin D levels in your blood so you can treat them with supplements before they cause health problems. Abnormal vitamin D levels can indicate a number of medical conditions, including bone disorders, nutrition problems, organ damage, immune diseases, and cardiovascular disease.	\$45.00
